NOTICE**

Take Notice that

Wednesday April 18

has been appointed as

Civic Clean-up Day

and all citizens are requested to use this day for the purpose of cleaning up their yards, corrals, stables, outhouses, ect. The co-operation of every citizen is requested.

Further take notice that all premises not cleared up by May 1st, will be cleaned by the Town Scavenger at the owner's expense.

R. A. VanOrman,

Cheif of Police.

News Notes

The winner of the 50 gallons of gas given by King Motors for the closest guess to the price of the new Ford coupe was A. E. Patey, Lethbridge. He guessed the exact amount, \$850.

Monday's west bound train was held here several hours, a result of the weakened condition of Pot Hole bridge.

The Stake M. I. S. play "Nothing But the Truth" will be staged next Monday in the Opera House. Miss Ruth Holt and Lon King will handle the leading parts.

The next meeting of the U. F. W. A. will be held at the home of Mrs. Elsie Stevenson on March 27 at 4.30 p. m.

Hotel Marquis has been selected as the name of the new community hotel under construction at Lethbridge. It is felt that the choice of this name commemorates the wheat, the introduction of which has done so much for agriculture in Western Canada.

More than 500 people were in attendance at the dance given by the Relief Society on St. Patrick's Day. Dance, lunch and program were given at 25 cents for each person. The Opera House was given free of charge. The sum of \$80 was cleared.

Miss Orpha Vance, the winner of the local oratorio, will compete for the Southern championship at Lethbridge next Friday, March 30th. All interested will no doubt be in attendance. There will be at least six contestants.

L. D. S. Ritual Services will be held in the High School building tomorrow, Saturday, March 24 at 2:30 p. m. All interested please take notice.

Tomorrow night the Union Jacks will go into action against the Edmonton Y. M. C. A. team, one of the fastest aggregations ever organized in Canada. The Jacks face a handicap of 7 points, the margin by which they lost the game at Edmonton; and to be declared provincial champions must win tomorrow's game by at least 8 points. They will have the advantage of their home floor and the support of hundreds of rooters. Tomorrow night's struggle promises to be as interesting as that between the Winnipeg Toolers and the Jacks last year. The Jacks and Raymond fans are confident that they will again compete for Dominion honors. Tomorrow night will tell the tale.

T. O. King is New B. of T. Head

Fresh impetus was given the local Board of Trade last Wednesday when about 70 sat down to the banquet held at the Utah Cafe. Membership cards and dinner tickets were sold two days previous and as a result of the drive the cafe was well nigh filled to capacity. A new organization was effected and the activities of the board this year will undoubtedly do much for the progress of Raymond and district.

T. O. King heads the new organization, being elected by a big majority over the two other nominees, Ray Knight and T. Geo. Wood. Ray Knight was elected vice-president and T. L. Halpin was elected secretary. The executive committee consists of T. Geo. Wood, Phil Baker, F. T. Holt, L. L. Pack, C. C. Watson and W. H. Zohell. The following were appointed to the finance committee: W. G. Weeks, C. W. Lamb, H. F. Allen, L. D. King, DeLoss Lund, S. B. Card, W. Clemis, D. A. Bennett, Geo. Ralph, J. D. Hall and Jas. H. Walker. The road committee consists of F. R. Taylor, J. W. Evans, and N. W. Peterson. Outgoing officers were tendered a vote of thanks.

Immediately following the dinner the outgoing president, D. A. Bennett, introduced Mr. Smoot, of the Utah Idaho Sugar Company. Mr. Smoot urged the farmers to support the local factory and spoke of the benefits of beet raising to this community. He was followed by T. Geo. Wood, who spoke along similar lines, and quoted figures to prove the value of crop rotation, using beets, wheat and sweet clover. He also praised the Taber-Barnwell farmers for the way they have gone into the beet raising industry.

W. G. Mendenhall spoke briefly but to great effect on road building. He estimated that with the use of two 5-ton trucks the municipality could gravel roads at an approximate cost \$1000 per mile. He advised the grading up of low spots and the use of larger culverts.

The meeting was then turned over to the purpose of reorganization. Secretary Holt read the minutes of the last annual meeting. He reported the sum \$357 to the credit of the board, and the sum of \$300 to the credit of the stampede committee. To the first amount would be added the money collected in the recent drive.

After the newly elected president, T. O. King, took the chair discussion centered on securing a gravelled road from Caddock to Welling. It was decided to abandon all attempts to divert the Sunshine trail, but to devote every effort to have a secondary road made via Raymond. To this end the road committee was appointed.

The subject of this year's stampede was then introduced. Ray Knight had tentative plans to hold the show in Lethbridge and invited the board of trade to co-operate with him on a partnership basis. However, as this would entail the guarantee of a large sum of money on the part of the board, and as many were of the opinion that the stampede should be held here, Mr. Knight's plans met with considerable opposition. The finance committee were instructed to go into details of the idea and make a report. As the cost of such an undertaking would approximate \$6000 it is hardly likely that the board will make the venture. It is possible, however, that Mr. Knight will promote the show alone.

N. W. Peterson was elected reeve for the Sugar City Municipality last week. He succeeds J. H. Walker.

The Jacks returned home from Edmonton last Monday after the first game of the championship series. The score was 34-41 in favor of the Edmonton Y. M. C. A.

Canada's Future

Canadians should take a big view of their country and its future. There should be nothing narrow nor small in their conception of the Dominion present or future, but rather our vision should be broad, large and courageous. The individual who persists in looking out on life through blue spectacles, who can never see any possibility of success ahead because of obstacles in the path, who is forever contrasting his inferior position with that of a more successful neighbor, will be a failure. And what is true of the individual is equally true of a nation.

The habit indulged in by some Canadians, both in public and private life, of comparing Canada with its sixty years of history as a confederated unit with the United States with its 150 years of union, and Canada with its ten millions of people with the more than one hundred and ten millions in the United States, is just as absurd as it would be for a merchant established one year in business and with five employees to complain that his business turnover was not equal to that of another merchant with a business of many years' standing and a staff of employees ten times as large. Yet many people persist in comparing Canada of today with the United States of today, instead of comparing Canada with the United States when that country was of the same age or had approximately the same population.

Comparing Canada with the present United States gives the latter the advantage, but the advantage is all with Canada when it is compared with the United States at the same age or with an equal population. Even making full and ample allowance for changed conditions resulting from science and inventions, discoveries and advancements of all kinds, the contrast is decidedly and greatly in Canada's favor.

For example, it was not until the United States had a population of seventy-five millions of people that its trade reached the figure which Canada now enjoys with ten millions of population. When the United States had a population only equal to that of Canada today, it did not cut much of a world figure; it was not a leader in any department of world production or commerce; rather it was engaged in the pioneer task of its own domestic development, and it would have been just as reasonable to decri the United States and its future then because it did not measure up to the older countries of Europe, as it is now to decri Canada and its future because it has not already attained to the stature of the United States.

Young in years and small in population, Canada is today a real factor in world affairs. It has outstripped the United States and all other countries in the manufacture of paper, it has become the world's greatest exporter of wheat, it is the chief source of the world's supply of nickel and asbestos, year by year it is overtaking the United States in the production of gold and is not now far behind. For some years past employment has been as general as in the United States, and in the last two years has been even better. Canada today finances itself to an extent the United States was not able to do until it was many times our size.

Nowhere else in the world are there two nations living side by side, speaking the same language, with the same monetary system, and having similar customs and ideals. Yet there are people who profess surprise that there is a constant exchange of population across our international boundary line, and that the larger and more powerful magnet of the United States should attract the greater number. It would be against all reason and nature if it were not so. Yet we make bold to predict that the day is not far distant when Canada will prove the more powerful magnet of the two, and population will flow from the United States into Canada in a greater and more steady stream than has ever flowed southward.

Paradoxically, many of the very people who deplore any exodus of Canadians to the United States, at the same time object to United States people and capital coming to Canada because of a fear that Canada will thus become Americanized. Others object to Canadian capital being invested in the United States or other countries, claiming it should be kept at home for investment and development purposes.

In all this is to be seen an attitude of doubt, of fear, a spirit of "little Canadianism," expressive of an inability to stand on one's own feet. It is an attitude which, were it at all general, would inevitably drive the self-reliant, forward-looking youth of Canada out of the country. Such people would do well to throw away their blue spectacles, and realize that Canada is on the map of the progressive nations of the world to stay. They should become imbued with the considered opinion of the Prince of Wales who recently declared: "Canada is on the threshold of one of the most astonishing eras of expansion and development ever seen. Exactly how long that will take none of us know, but certainly it will occur in the lifetime of many of us."

Seeking New Trade

Most of the imported things that Canadians buy come from the United States. But our neighbors are not satisfied and the U.S. Department of Commerce is opening an agency in Winnipeg for the promotion of the sale of American goods in western Canada, believing that unto him that hath, the trade shall be given.

The average consumption of fruit in England is 93 apples, 37 oranges, 52 bananas and 15 lemons per person per year.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Excursion To Sweden

Many Are Planning To Visit Native Lands On The Baltic Sea
Rev. Oscar Gunnerfelt, of Winnipeg, is organizing a special midsummer excursion to Sweden, Norway, Denmark and Finland, which is to leave Winnipeg about May 14, by Canadian National Railways, and will sail from New York May 21, on the S.S. Drottningholm. Already quite a number of applications have been received for reservations, and it is expected that a large party from Western Canada and Minnesota and North Dakota will take advantage of this opportunity of revisiting their native lands on the Baltic sea.

Silk Stockings

Have stockings in the very newest shades; your old or faded stockings given any tint in the rainbow in five minutes; with fifteen cents' worth of Diamond Dyes! But use dyes, not synthetic dyes. And be sure they're true dyes.

Try a pair tonight! Use Diamond Dyes, and no one will dream they were tinted at home. And you can do real dyeing with just as perfect results, if you will just use the true Diamond Dyes.

Just Dip to TINT, or Boil to DYE

Growth Of Wheat Pool

Now Has a Membership Of 140,000 Farmers

The most recently compiled returns show that the Canadian Wheat Pool has a membership of 140,000 farmers with a wheat acreage under contract of 15,500,000 in the provinces of Manitoba, Saskatchewan and Alberta. The Pool operates 942 country grain elevators with a total capacity of 30,000,000 bushels and ten terminal elevators with a total capacity of 25,000,000 bushels. During the last crop year the Pool shipped 124,000,000 bushels of grain to 24 countries through 60 ports of the world, 50,000,000 of which went to the British Isles.

Canada Has Bought Twenty Light Planes

Will Be Loaned To Clubs Which Comply With Conditions

Canada has augmented the fleet of light aeroplanes for loan to civil flying clubs throughout the country by an additional 20 moth planes, the products of a British concern. The moths have already been delivered.

On order to the Government, the planes will be distributed to clubs which comply with the conditions laid down by the Department of National Defence.

The Minister of National Defence announced he had signed a formal agreement with the directors of the Saskatoon Aero Club for the loan of two light planes to the club and the granting of the other forms of assistance, laid down in the standard conditions under which the formation of such clubs will be approved.

Corns are painful growths. Holloway's Corn Remover will remove them.

Canadian Nationality

To the unanimous national protest against the objectionable practice of census statisticians in refusing to recognize such a thing as a "Canadian" nationality, the government must pay heed. It is absurd to style a child whose grandfather was an Englishman married to a Scots woman; whose father was born in Canada and married a Swedish woman, as English. The lad is a Canadian, second only in standing to the North American Indian. —Western Producer.

Alice: "What did he do after he called you a crazy halfwit and a sour-faced monkey?"
Doris: "Well, then he became insulting."

It is much easier to be critical than to be correct.

Keep Minard's in the Medicine Chest.

Machine Preserves Secrecy

Secrecy Over Radio

New Method Has Been Tested and Found Satisfactory

Secrecy in voice transmission by radio was successfully demonstrated by the use of a combination of high and low frequency transformers to distort human speech and jumble it to make it unintelligible to the human ear.

The feat was accomplished in a demonstration before a group of engineers, scientists and business men at the City Club, by Sergius P. Grace, general commercial engineer of the Bell Telephone laboratories.

An electric translating "brain," which picked up the intentionally intermingled high and low frequencies, rearranged them in their proper places, modulated them and sent them through loud speakers in proper relation, did the trick, and convinced the audience that secret voice transmission by this method is a scientific fact.

Practical application of the device, it was pointed out, would protect the transatlantic long distance radio telephone service from the ears of all except those for whom it is intended. At present the messages are transmitted on a wave length so low that few stations have apparatus which can be tuned to pick it up, but the new device will assure secrecy under all conditions.

NEW STRENGTH FOR ALL WEAK GIRLS

Comes From the Rich, Red Blood Made By Dr. Williams' Pink Pills

There must be no guesswork in the treatment of pale, anemic girls and children. If your daughter is languid, has a pale, sallow complexion, is short of breath after slight exertion or on going up stairs, if she has palpitation of the heart, a poor appetite, or a tendency to faint, she has anemia—the medical name for poverty of the blood. Any delay in treatment may leave her weak and sickly for the rest of her life. When the blood is thin and watery give Dr. Williams' Pink Pills, coupled with nourishing food and gentle out-of-door exercise. The new, life-giving blood which comes from a fair use of Dr. Williams' Pink Pills, increases the appetite, stimulates the nerves and brings a glow of health to pale cheeks. Mrs. Robert Jackson, R.R. No. 5, Shelburne, Ont., praises this medicine for restoring her daughter's health. She says: "When my daughter was nine years old she was so weak and thin that we feared we would lose her. She was very nervous, and going to school seemed too much for her. Often she would have to stay at home for days at a time. At times she would have a very high fever, and the doctor's treatment did not help her. I tried several remedies, but with no good results. One day a friend advised me to give her Dr. Williams' Pink Pills, and I did so. It was not very long after she began taking the pills that I could see a change for the better. She kept on taking the pills for several months, and through them grew into a strong healthy girl. Since then, if a tonic has been needed at any time, it has always been Dr. Williams' Pink Pills."

The pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Grain Moving Westward

Exports of grain through the port of Vancouver, B.C., during January totalled 14,183,183 bushels and for the 1927 crop shipping season to the end of the same month 36,359,044, both constituting new periodic records.

Fortify Yourself Against Colds!

Toronto, Ont.—"I would have a spell of sore throat a couple of times every year, especially in the winter, and it would be a couple of months each time before I would fully recover and get my voice back. I doctored and took medicine with little relief until I began taking Dr. Pierce's Golden Medical Discovery and I have so completely relieved me of this trouble that I scarcely ever have a sore throat or suffer in any way from my former trouble. It has been worth its weight in gold to me."—Mrs. A. McDonald, 28 McMurrich St.

All dealers. Fluid or tablets.

Write Dr. Pierce's Invalids Hotel in Buffalo, N. Y., for free medical advice.

Northern Saskatchewan Development

Provincial Government Is Planning To Aid Mineral Prospectors

The new department of industries of the Saskatchewan Government is planning to aid mineral prospectors in the northern sections of the province. In conjunction with the Dominion Government, aerial surveys will be continued, and it is hoped that the whole north-eastern mineral area will have been surveyed and reduced to geographical maps by the end of next year. The department is getting itself in the position whereby it can be of every assistance to the prospector and investor. At the present time there is very little accurate information of Saskatchewan northern mineral areas. Recognizing that great development can be looked for both in these areas and the western mining areas of Northern Manitoba, the provincial department is speeding up aerial mapping of the territory as well as the plans for its own provincial activities in the coming season. The minister states it is the intention of his department to place its facilities at the disposal of the prospector and the investor. "The miner will be given every possible assistance," said Mr. Spence, "at no cost to himself to develop his proposition. We will assist him through our experts at the university and do everything possible to place him in the position of developing any proposition which appears to have evidence of successful working out. To the capitalist the department will be prepared to offer to assist in developing water powers and coal fields and to co-operate in every way."

Asthma No Longer Dreaded.
The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that complete reliance is placed on this true specific with the certainty that it will always do all that its makers claim. If you have not yet learned how safe you are with this preparation at hand get it today and know for yourself.

Rushing Work On Flin Flon Railway

Road Will Be Completed To Mine By Spring

With 1,250 men on the job, work on the building of the Flin Flon railway into Manitoba's rich new mineral area is being pressed day and night.

Seven bridges have been driven, the steam shovel is working at Mile 6 and gravel pits are being opened at Miles 10 and 15. Grading has been completed to Mile 42. Camps have been built, clearing is completed and grading is going on West of Mile 50. The drag-line is at Mile 50. Niacety teams and four Linu tractors are hauling supplies.

Twenty-seven hundred tons of supplies have been delivered to camps West of Mile 50. The telephone line has reached Mile 31.

Because much of the country is muskeg, the contractors are making the winter work for them and are laying the tracks on the ground. Before the break-up, they will have reached the mine and all supplies will have been deposited ready for the ballasting of the track when spring arrives.

Curious New Lifeboat

Invention Of Ship's Carpenter Said To Be Unsinkable

A ship's carpenter, after 60 years at his trade, has invented a new lifeboat of a very curious kind.

It is practically two broad, shallow boats fixed bottom to bottom, so that as one half is capsized the other half is righted. It is said, however, to be practically impossible to capsize it, still more to sink it. In the double bottom are valves which will let the water out but will not let it in whichever way up the boat is; and there are tanks for fresh water and food which can be reached whichever side of the boat may be uppermost.

World's Oldest Christian Church

The oldest Christian church in the world, built during the third century, stands within the shadow of Mount Ararat, at Etchmiadzin, in Soviet Armenia. Gregory the Illuminator, whose the Armenians believe converted them to Christianity, is supposed to have been its founder, and it is for that reason known as St. Gregory's Cathedral.

Silica Sand In Manitoba

Deposits of silica sand, possibly suitable for glass manufacture, are found on the shores of Black Island, Lake Winnipeg, as well as at Beausejour, Manitoba.

In a moment of weakness the Hamilton Herald advocates 'Aunt I?' as a substitute for 'Am I not?' That paper ought to have its head x-Aunt I.

Minard's Liniment kills warts.

Birds Make Wonderful Flight

Lapwings Complete Non-Stop Flight Across Atlantic In December

An astounding non-stop performance by hundreds of lapwings that flew the 2,000 odd miles from England to Newfoundland in December gales has just become known. The flight is easily the most wonderful of any recorded in bird life. The lapwing is known in the north of England and Scotland as the "pewit," and its eggs are sold in London as "plover" eggs. It is not the first time that a lapwing has crossed the Atlantic, but never before have hundreds crossed together. Stragglers get across by unknown means, but a flock would have to make a non-stop flight. To realize the immensity of their performance it must be understood that only hunger would drive them from this country. Therefore they must have begun their flight in a semi-starved condition. For part of the way they would be assisted by having the gale behind them, but it was impossible for them to have such a gale all the way. In the last stages of their marathon flight they must have fought against heavy odds.

Internal parasites in the shape of worms in the stomach and bowels of children sap their vitality and retard physical development. They keep the child in a constant state of unrest and, if not attended to, endanger life. The child can be spared much suffering and the mother much anxiety by using a reliable worm remedy, such as Miller's Worm Powders, which are sure death to worms.

Wins Many Prizes

Widely Known Horseman From Brampton Will Reside In Saskatchewan

W. J. McCallum, the widely known horseman of Brampton, Ontario, and Regina, Saskatchewan, has completed arrangements whereby he will permanently reside in Regina and have his stables there as a distributing point. Mr. McCallum entered over 100 horses at the Royal Show, Toronto, last fall, filling three stables with his own importations. No exhibitor ever won so many championships and prizes as he won at that show.

The Oil Of The People.—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

Tar Sand Deposits

The Murland Oil Company have been investigating the possibilities of the tar sand deposits on the Athabasca River in Northern Alberta, and contemplate establishing a plant for the extraction of oil based on a process that has been developed at Denver, Colorado.

Troubled With Painful Eruptions Cuticura Healed

"I was troubled with itchy, sore eruptions on my head for over a year. They were very embarrassing in company as I wanted to be scratching all the time, and if I did scratch them a watery fluid came from them. They were very painful, and my hair came out in patches. I tried many remedies during that time but without success. I read an advertisement for Cuticura Soap and Ointment so purchased some. The irritation stopped after one week's treatment, and after using three cakes of Cuticura Soap and three boxes of Cuticura Ointment I was completely healed." (Signed) Miss B. Rendall, 309 Kensington St., St. James, Man., Sept. 7, 1927.

Cuticura Soap, Ointment and Talcum are all you need for all toilet uses. Soap to cleanse, Ointment to soothe, Talcum to powder.

Sample Each Free by Mail. Address Canadian Drug Co., Montreal, Que. Soap, 25c; Ointment 25c and 50c; Talcum 25c. Cuticura Shaving Stick 25c.

First Large Contingent Of British Farm Laborers This Year, Have Arrived

Saint John, N.B. The first large batch of British farm laborers this season arrived here on the steamer Montclair. There were 60 single men in the number. They were brought out under the supervision of the colonization department of the Canadian Pacific Railway. There also were ten British families brought out under the termination scheme.

Several prominent persons were on the Montclair, which docked recently from Liverpool, Belfast and Greenock. She had on board 125 cabin and 512 third-class passengers, and a large amount of mail and express matter.

John Walter, M.A. (Oxon), of London, Eng., was on the steamer. He came out as the guest of the National Council of Education and was accompanied by Mrs. Walter Keith. Keith Morris, writer for The Financial Times, of London, also was on the boat.

A line looking group of 25 boys were brought out by the British Immigration and Colonization Association. Most of them have been trained in farm work and will be distributed to farms from Montreal.

Two families brought out under the 3,000-family scheme, were on the boat. One family numbered 11 and the other four persons. There also were ten domestics for Regina.

Trying India Flight First

Noted British Aviator May Then Attempt Atlantic Hop

London.—Captain Walter Hinchcliffe, noted British aviator, has announced that he is planning a flight from Europe to the United States in May or June but will directly attempt a non-stop flight from England to India as a preliminary test.

The captain thus cleared up the mystery surrounding his plans and denied that he had any intentions of starting for the U.S.

"My destination will be Karachi, 4,000 miles from my starting point, and it will be probably three weeks before the test flight is undertaken," he said.

The captain added that Miss Elsie Mackay, titled British heiress had given financial support to his undertaking but would fly with him neither to India nor America.

New Discovery At Flin Flon

Another Ore Body Located Said To Be Important

Toronto.—Reports from Flin Flon Mines are that a new ore body has been located south of the main ore body. It is stated that the new find is one of considerable importance.

Development work is being pushed forward energetically. On the 400-foot level a crosscut 240 feet in width has been drilled on for a length of approximately 300 feet. The average value obtained has been 2 per cent. copper and some zinc, but some sections are of much higher grade, one of 28 feet width running between 5 and 6 per cent. copper.

The work of preparing a new town-site is well under way, and sites have been selected for the concentrator and smelter. The present camp buildings will be removed to make room for the new plant.

Will Visit America

New York. Premier Benito Mussolini of Italy, has promised the World Anti-Narcotic League to come to America to attend a proposed world conference of women on the drug traffic.

Equal Suffrage Promised To Women Of Britain By Baldwin Government

London. Stanley Baldwin, the first British prime minister to appear before an equal suffrage meeting, promised a vast assembly of women representing 140 organizations that "in a few weeks" Parliament would grant them complete equality with men in voting privileges.

This declaration was received with frenzied cheering by the women, who had met to celebrate the success of their bitter fight extending over nearly 100 years.

"I have selected the home secretary to be the Joshua, who shall lead you into the promised land," said

Escape Death When Airplane Crashes

Eight Passengers On London To Paris Flight Were Uninjured

London.—Eight passengers of an aeroplane flying from Paris to London had a remarkable escape when the machine crashed in a field near the Lympne airfield in Kent. Baroness Van Till Crouch Kavanagh, of the Hague, was cut in the face by glass, but the other passengers were uninjured.

Trouble was experienced when the plane reached the French coast, and its speed was reduced. Near the airfield the left wing suddenly dipped, and the plane spiralled rapidly toward the earth. It crashed and bounced several times after the wing struck the ground. The passengers were jolted all over the place and the baggage tumbled about.

Unconcerned, the pilot, Roger Maury, climbed out of the cockpit, opened the passengers' door, and all scrambled to safety, fearing the machine might catch fire as both engines were wrecked.

Later Pilot Maury explained that a valve spring in one of the engines had apparently broken.

Reduction In Express Charges From Europe

Canada Divided Into Zones and Lower Rates Announced

Montreal.—Reductions as high as \$1.77 in the scale of charges on packages up to 15 pounds in weight originating in Europe and destined for the Dominion have been made at a conference of the two major express companies in Canada held recently. These reductions come into effect this year.

Canada has been divided into three zones comprising, first: Nova Scotia, New Brunswick, Prince Edward Island, and Quebec; second, Ontario; third, the Prairie Provinces and British Columbia. The charges are reduced to the Western provinces as follows:

Packages of three pounds or under, \$1.20; over three pounds to seven pounds, \$1.70; over seven pounds to 11 pounds, \$2.20; over 11 pounds to 15 pounds, \$2.68.

Pictures Cannot Be Shown

Photos Of Lieut.-Col. Amery's Tour Will Not Be Exhibited

London.—In connection with the recent Empire tour of Lieut.-Col. L. C. M. S. Amery, secretary of state for Dominion Affairs, photographs of various places and interesting incidents were taken by Captain William Brass, M.P., former private parliamentary secretary to the Minister of Health and the Chancellor of the Exchequer, who accompanied Col. Amery on the tour. It was proposed to exhibit the pictures within the precincts of the House of Commons. Now, however, permission for the exhibition has been refused by the Lord Chamberlain, the Earl of Cromer, with whom the decision on the matter rests.

Earthquake At Victoria

Victoria, B.C.—A severe earthquake was recorded on the seismograph at Gonzales Heights Observatory this morning. The record commenced at 10.20 a.m. and lasted for over three hours. The place of origin is estimated at 7,000 miles distant.

Saskatchewan House Has Concluded Sessions

Thirty Bills Were Put Through In Final Session

Regina.—With traditional dignity and solemnity His Honor Lieutenant-Governor Nowlands prorogued the third session of the sixth Saskatchewan Legislative Assembly. Since January 24, thirty three sittings were held during the session, including 11 night sittings, four morning sittings and a Saturday sitting.

The closing ceremony came after a long busy day during which more than 30 bills were put through the closing stages and passed. One of the last items of business transacted by the House was the passing of supplementary estimates totalling \$1,118,518 to cover expenditures already incurred. These were put through with little interruption, except a question now and again as to how the money was spent. An item of \$11,500 was required for the Power Commission's work. The main items included \$55,208 for the Treasury including a grant of \$10,000 to the Canadian National Institute for the Blind, and \$25,198 for Freight Rates Inquiry; \$500,000 for the Farm Loans Board; \$193,000 for the Educational Department; \$52,220 for the public health department.

Votes totalling \$24,300 were included in additional estimates to bring the indemnities for members of the Legislature up to \$2,000 a year from \$1,800; to provide \$3,000 for leaders of the Opposition and to give the Premier an increase of salary from \$6,000 to \$7,200 a year. These increases were discussed a day or two ago when it was pointed out that Saskatchewan members were the lowest paid in any legislature west of the Maritime Provinces, and Howard McConnell, the member for Saskatoon, declared Premier Gardiner, while the hardest worked man in the province, was poorly paid when there was no reason for the province to be too niggardly.

Government Bill Criticized

One Day's Rest In Seven Bill Does Not Please Manitoba Laborites

Winnipeg.—Though it was given second reading the Brackett Government's bill for one day's rest in seven for certain employees was severely criticized by the Labor and Conservative leaders in the legislature.

Under the bill, declared John Queen, Labor leader, the bill only applied to employees already getting one day's rest in seven. Mr. Green described the bill as "a bluff," the work of an unsympathetic administration.

"The bill," said Mr. Queen, "applied to piano and organ factories, though there were none in the province. Why not, on the same principle, apply it to shipbuilding, the building of dreadnaughts and submarines? Let us have a real act, when we are at it."

Boy Inherits Millions

Young Son Of New York Millionaire Receives Legacy

New York.—A five-year-old boy today had joined the ranks of American millionaires. John Mortimer Coward, 3rd, of Glenridge, N.J., is to receive at least two-thirds of the more than \$4,000,000 estate of his father, J. Mortimer Coward, late head of the Coward Shoe Stores, who died in Havana recently.

Part of the fortune which the five-year-old boy inherits is \$1,000,000 from an insurance company policy his father took out last July. Mr. Coward was 28 years old.

Australian Rugby Team Here

Nothing but praise for the sportsmanship of Old Country people was expressed by the Waratahs, New South Wales, Australia Rugby Team, when they arrived in Canada recently on the Canadian Pacific Steamship Melita. During their nine months' tour of Great Britain and France, where they played 33 games with record crowds in attendance, some times exceeding fifty thousand, they

Daring Aviators Return To Safety

Flying Officer A. Lewis (1), and Flight Sergeant N. S. Terry (2), crew of the Fokker plane Saskatchewan, who were missing since February 17 until March 1st. Their plane being wrecked, they managed to travel overland sixty miles to Port Burwell, after suffering incredible hardships.

Woman Liberal Elected In Britain

Mrs. Walter Runciman Successful Candidate In St. Ives

Penzance, Eng.—The first woman Liberal in the present British Parliament and the first husband and wife combination in the House of Commons have resulted from the recent by-election in Saint Ives.

Mrs. Walter Runciman, wife of the Liberal member for Swansea West, not only became the first woman Liberal in the present House, but succeeded in capturing the St. Ives constituency from the Conservatives. The district formerly was a Liberal stronghold, but returned a Conservative at the last general election in 1921.

Mr. Runciman, who is a prominent figure in the Liberal party, actively supported his wife's candidacy.

Reward For Eskimo

Suggestion Made In Parliament That Recognition Be Given "Bobby"

Ottawa.—"I would like to ask the Government if it is willing to give consideration to the matter of rewarding in some form or other the Eskimo "Bobby," whose knowledge and skill were largely responsible for saving the lives of Flight Lieut. Lewis and Sergeant Terry off the Labrador Coast?" asked John Miller, Liberal-Progressive, Qu'Appelle, in the House.

Hon. J. L. Ralston, minister of national defence, replied that the full report of the activities of all individuals in the rescue of the two airmen had not been received by the department. As soon as the full report was received the whole matter of reward would be given consideration.

Interim Pool Payment Of Nearly \$28,000,000 Is Now Being Made

Weekly Newspaper Men Meet

Hon. Chas. Dunning Speaks At Banquet In Connection With Directors' Meeting At Ottawa

Ottawa.—The annual meeting of the directors of the Canadian Weekly Newspapers' Association was held in the Chateau Laurier, with a full representation of the provinces. Business of urgent importance was under consideration. A banquet was tendered by S. N. Wynn, Yorkton, Sask., president, at which Hon. C. A. Dunning and Geo. McPhee were invited guests. The address given by the minister of railways was greeted with enthusiasm and the member for Yorkton spoke also of the great power of the press in the moulding of public opinion. Those present from Saskatchewan included D. C. Dunbar, of The Estevan Mercury, and S. J. Dornan, of The Alameda Dispatch, the latter during an address at the business sessions stressed the necessity of greater co-operation and tendered a hearty invitation to the association to meet in Regina, the convention city, in June.

Infant Princess Dies

Six Months' Old Daughter Of Emperor Of Japan Succumbs

Tokio, Japan.—The six months old daughter of Emperor Hirohito of Japan, is dead. "Complications following pneumonia," was assigned as the cause of the death of the Imperial baby, who had been critically ill for several days.

The child was originally attacked by influenza, from which the emperor himself also suffered, together with thousands of Japanese people. It was announced that the emperor was convalescent.

At the bedside of little Princess Hise were the Empress and other members of the royal family. There will be no official mourning as the child was under seven years of age, and no public mourning. Interment will be under Shinto rites at Asakusa, near Tokio, where the late Emperor Taisho is buried.

Sterilize Feeble-Minded

Edmonton. Following one of the stormiest passages that any measure before the Alberta House has been accorded in recent years, the Sexual Sterilization bill was given third reading and will be put into effect as soon as it has been assented to by the lieutenant-governor. By this action of the legislature, Alberta becomes the first province in the Dominion of Canada to undertake sterilization of the feeble-minded.

Gift For Medical Research

Stockholm. At the request of the monarch himself, Sweden's birthday gift to King Gustav V. will be devoted to work for suppression of cancer. A national subscription for the fund in honor of the king's 70th birthday, June 16, has been started, and the king has accepted in advance, on the promise that the money be used for medical research.

Would Give No Credit To Government For Success Of C. N. R.

Ottawa.—Hon. Hugh Guthrie, House leader of the Conservative opposition last session, charged the finance minister and the minister of railways with endeavoring to appropriate to themselves credit due to Sir Henry Thornton. They were endeavoring to bask in the reflected glory

of the president of the Canadian National, Mr. Guthrie declared. He thought Sir Henry and the board of management of the Canadian National should be congratulated upon the "splendid showing" they had made during the past year. Net earnings of the Canadian National had increased by \$125,000,000, in four years—\$125,000,000 which formerly had to be withdrawn from the treasury of the Dominion. "The government," Mr. Guthrie pursued, "was not entitled to a particle of credit. Sir Henry Thornton and the board were entitled to the full credit for the result obtained."

Also speaking on the budget, W. T. Lucas (U.F.A., Camrose), described results of the 1926 census in western Canada as startling. The prairie

Winnipeg. — Nearly twenty-eight million dollars is now being distributed as a first interim payment on wheat and flax by the wheat pools of Manitoba, Saskatchewan and Alberta, and the coarse grains pools of Manitoba and Saskatchewan.

"We are making a straight payment of 15 cents a bushel on all grades of wheat and flax," stated Mr. E. B. Ramsay, manager of the Central Selling Agency, in announcing the payment. "The Coarse Grains Pool made a first interim payment in January on barley, rye and oats, bringing the total already paid on oats up to 50 cents per bushel, 65 cents a bushel for barley and 85 cents a bushel for rye."

"Over eight hundred million dollars has now been distributed by the three Western pools since the Alberta pool started in 1923," said Mr. Ramsay.

"Our receipts this year show a large increase in deliveries to the three pools over any previous year and a still greater increase in the amount of grain handled through the pool elevators. Even in Manitoba, where the crop was so badly injured by rust that the wheat yield was almost cut in two, the 59 pool elevators have averaged more than a hundred thousand bushels so far this season, and in Saskatchewan and Alberta the pool elevators should average between a hundred and twenty-five and a hundred and thirty thousand bushels for the season."

"For the crop year 1927-28 the three pools have handled more than a hundred and eighty-five million bushels of wheat, which is nearly six million bushels over the entire amount delivered by the three provincial pools to the Central Selling Agency for the crop year 1926-27."

The Saskatchewan pool is mailing cheques to its members for \$17,507,067, as interim payment on 116,378,945 bushels of wheat and 234,531 bushels of flax.

For Alberta, which has no coarse grains pool, the figures are \$8,700,000 for approximately 58,000,000 bushels of wheat.

The Manitoba Wheat Pool is paying \$1,507,763 on 10,451,755 bushels of wheat and \$11,005 on 238,171 bushels of flax."

Fight Destructive Insects

Ottawa.—The fight against the destructive insects which prey upon Canadian crops was described by Arthur Gibson, Dominion entomologist, to the convention of the Canadian Horticultural Council here. The use of the aeroplane for dusting in an endeavor to rid the crops and soil of certain insects was experimented in last year and proved quite promising.

Edmonton Gets Convention

Ottawa.—Directors of the Canadian Weekly Newspaper Association, meeting here today, decided to hold the annual convention this year at Edmonton, during the first week of July. There will be a side trip to Jasper Park and other points in the Rockies. Over 200 are expected to attend the convention.

Would Give No Credit To Government For Success Of C. N. R.

Ottawa.—Hon. Hugh Guthrie, House leader of the Conservative opposition last session, charged the finance minister and the minister of railways with endeavoring to appropriate to themselves credit due to Sir Henry Thornton. They were endeavoring to bask in the reflected glory

of the president of the Canadian National, Mr. Guthrie declared. He thought Sir Henry and the board of management of the Canadian National should be congratulated upon the "splendid showing" they had made during the past year. Net earnings of the Canadian National had increased by \$125,000,000, in four years—\$125,000,000 which formerly had to be withdrawn from the treasury of the Dominion. "The government," Mr. Guthrie pursued, "was not entitled to a particle of credit. Sir Henry Thornton and the board were entitled to the full credit for the result obtained."

Also speaking on the budget, W. T. Lucas (U.F.A., Camrose), described results of the 1926 census in western Canada as startling. The prairie

Paris Plans Novel Campaign

Will Photograph Noises Of Auto Horns and Classify Them

The noise of Paris automobile horns is being photographed by a novel method as part of the campaign to quiet Paris.

The police are doing it. They have classified noise three ways. Agreeable noise, almost harmonious; supportable noise; and insupportable noise.

Instead of using its ears to judge the varying degrees and qualities of harmony in the noise of automobiles, the police have adopted a camera which transforms sonorous vibrations into luminous vibrations and then takes pictures of them. It is a comparatively easy matter to compare photographs with a standard photograph of an agreeable noise.

For the time being, the police are testing various makes of horns and classifying them as merely desirable or undesirable. Eventually they will forbid use of the latter. Later, if a policeman hears a disagreeable horn, he will send the driver to have his noise photographed. A stiff fine awaits an unsatisfactory photographic proof.

The camera does away with the policy of protest on the ground that a policeman's ear is not trained to detect harmony or cacophony.

Paris taxicabs are the principal offenders for they have a honking horn which has a disastrous effect on unsteady nerves. Paris has never before had a serious anti-nerve campaign and chauffeurs have gone noise wild. When traffic does not move smoothly or swiftly enough for cars behind, the drivers engage in incessant tooting which adds to the din of Paris streets.

As an opening move in the campaign the police have begun to enforce a century-old law which forbids news boys to cry their papers on the streets.

Character In a Laugh

Hearty Laughters May Be Trusted Says Student Of Psychology

"People who laugh heartily may be trusted," said a student of psychology recently. "These people laugh with the vocal chords, and they are usually generous and sympathetic."

"Laughter is a sure indication of character. The man who laughs in his throat, with an almost strained face for example, is generally shrewd and cautious, and not always over-assertive in his methods."

"Inside" laughers, whose shaking shoulders express their mirth, are good-natured, and make excellent parents, while those who laugh without a smile are hard-hearted and cruel. People with little jerky laughs are often of shallow character, and are unable to withstand temptation. They are, however, often mentally brilliant.

"People who laugh explosively and loudly are not the hearty, bluff creatures they are generally believed to be."

"The large-hearted souls are those who laugh but rarely, but whose joy is reflected in eyes, lips and face."

Settlers Should Be Selected

Opening Doors Too Wide Is Not Considered Wise Plan

The United States must stand always as a warning to Canada and an example of what we should not do with regard to immigration. It opened its doors at one time too wide. It paid little or no attention to the selection of immigrants, looking to its melting pot to refine away the dross. But the smelting pot failed, and the United States was compelled, for its own protection, to adopt far-reaching exclusion laws. These laws, it hopes may save it from the mistakes of years. But it is possible they were adopted too late.

B. C. Grows Good Tobacco

Tobacco grown on the B.C. fruitlands property at Kamloops, Southern British Columbia, last season, is declared by Mr. Holman, B.C. tobacco products expert, to equal any tobacco he has seen anywhere. Farmers in this district intend to engage in tobacco culture in the future.

An old offender, being tried before the Bench, was accused of assaulting his wife.

"Liquor?" asked the Magistrate.

"No," answered the prisoner gloomily, "she licked me!"

Agent: "Don't you want your office furniture insured against theft?"

Manager: "Yes, all except the clock. Everybody watches that."

A reasonable woman is one who isn't unreasonable all the time.

HARDY BIRDS

These are some Edmonton, Alta., film stars which live in the open, summer and winter. Their aviary is a bird house is seen lit up for the night.

The other view is of the canaries sitting on a tray held by a piece of stuary.

Film Stars Have Trades

Leading Lights Of Hollywood By No Means Helpless

What would film stars do for a living if filming ever went out of fashion?

A scientist anxious to solve this problem has made a list of the trades represented by the leading lights of Hollywood, and has amassed enough evidence to prove that the film people are by no means helpless.

Their trades range from stage dancing to hair-cutting. Some of the screen favorites are pianists, some are landscape gardeners, two are (or were) college professors, one a coal-miner, another a "crack cornet soloist."

Animal training, printing, oil-well operating, cooking, the law, wrestling, boxing, chemistry, exploring are a few of the occupations which have been given up for a screen career. One of the leading actors was an undertaker!

World Slowing Up

Earth Rotates With Lessening Speed As Years Roll By

The time will come when the earth will stop spinning and the moon will crash down on it, said Sir Oliver Lodge, noted British scientist and spiritualist, in a recent lecture on "The Birth of the Moon."

"It will be millions and billions of years hence," he continued, "the speed at which the earth rotates is gradually slowing down owing to the friction of the tides. You need not be nervous. Each day is only a 240,000,000th part of a second longer than the day before."

"There was a time when the earth spun so fast that the day was only four hours long. At that time the moon was part of the earth, but it broke away and has moved slowly farther away ever since. In time the earth's rotation will cease, and the process will be reversed."

Knew What She Wanted

A class of children were wrestling with a lesson in arithmetic, and the scholars found that fractions were too much for them. The trouble started when little Doris declared that she would rather have half a jam tart than two-thirds of it.

"How often have I tried to drive it into you," said the exasperated teacher, "that two-thirds of anything is more than a half? Now you all know," she went on, "that Doris prefers a small portion of tart to a large piece. Funny child, isn't she?"

Doris having been held up as a model of stupidity, put up her hand. "Well," asked the teacher, sharply. "Please, miss," said Doris, in a small, clear, piping voice, "I don't like tart!"

Production of natural gas in Western Canada totalled 11,500,000,000 cubic feet in 1927 and the production of oil was 329,000 barrels. The province of Alberta is the source of practically all of the natural gas and oil produced in the Canadian West.

Mansions in the skies are built on the installment plan, and each good deed is a brick used in the construction.

BEES REQUIRE NECTAR

Reason Why Some Localities Better Than Others For Upkeep Of Apiary

Bees may be kept in any locality where there is sufficient nectar to maintain them, writes A. H. W. Birch, apiarist, Central Experimental farm. Some localities are better than others in that there is a greater variety of flowers or a greater profusion of them; therefore, a larger number of colonies of bees may be kept in one place than in another which is but a few miles away.

As good localities are often right at our doors, the smaller bee-keeper with but few colonies has not to bother about seeking for new ones as does the larger bee-keeper when his location becomes fully stocked.

In both country and city throughout the land, beekeeping is practiced with much pleasure and profit to many. In the fruit-growing districts where insects pollination is of so much importance, the fruit-growers have learned that the honey-bees, the only insects that can be relied on for cross-pollination, benefit them as much as they do the beekeepers.

On the farm also, especially where there is an abundance of alfalfa, sweet clover or alfalfa, bees return substantial profits when well handled; otherwise, however, they may become a menace to others keeping bees. In combination with some branches of poultry-keeping, beekeeping fits in admirably.

Turning to the city, one finds there, too, that bees are kept, though in many cases more for recreation than for profit, by professional men, tired business men, and even women and children. Gardening and beekeeping or poultry-keeping and beekeeping make a good combination for city dwellers or suburbanites. In more congested centres where gardens are scarce, apiaries are sometimes to be found located on the roofs of large office buildings.

Wherever bees may be kept, the golden rule applies. One should not intrude on the territory of another whose rights by reason of his being first in the locality should be respected.

Standing Room For Everyone

Isle Of Wight Could Accommodate All People In World

The New York authorities are said to be seriously concerned over the congestion of the business quarter, where it is reckoned that "there is not standing room for a quarter of the people in the skyscrapers," says a writer in the London Observer. Yet we are in no real danger, even in the most populous countries of having to walk on one another's heads. One can always recall the comforting calculation that there is standing room on the Isle of Wight for the entire population of the globe. It would be a tight fit—about four persons to the square yard—but it could be managed.

Adrian IV. was the only English Pope.

Whiskey is an accurate senses taker.

An Inhuman Device

Catching Animals In Steel Traps Should Be Abolished

To keep pace with the tremendous demand for furs that has been created within recent years it is estimated that in America alone more than one hundred million fur-bearing animals are caught in steel traps each year and put to death. In a recent issue of The Globe, a correspondent writing to the "Homemaker," makes a vigorous appeal against the use of these traps. She points out that the Ontario Society for the Prevention of Cruelty to Animals has had a bill framed for two years to do away with this cruel trap and substitute another that will be as efficacious and entail little suffering for the animal that is caught.

Such a humane piece of legislation as this will surely have the hearty support of every member of Parliament in either the Federal or Provincial Assemblies. No man who has ever seen an animal caught by the leg in a steel trap requires any argument to convince him of the inhumanity of this device. Could our legislators in some way be brought to hear the long wail of intolerable anguish and pain that goes up each year from many millions of creatures of the dumb creation they would not rest until the steel trap was placed with the thumbscrew, where it rightly belongs.

House-Hunting By 'Plane

Australian Flier Once Bought Home After Inspecting It From Air

Bert Hinkler, who started on a solo flight from Croydon to Australia on Feb. 7 and arrived there, is famous for his daring performances. In 1925 he introduced house-hunting from the air, and bought a seaside home after flying about the Kentish coast. He used a two-seater "baby" plane and took up his wife. This was his account:

"We circled all around the house at a low altitude, which is, of course, possible with such a machine. I flew near enough so that my wife and I could see what the bedrooms were like, and we were also able to inspect the other rooms."

Hinkler has "specialized" in small planes, and it was in a thirty-horsepower Aero-Avian that he left London to make Australia, 13,000 miles, in eighteen days. He reached Calcutta, 6,000 miles, in eight days. He then decided to cut his time to Australia to fifteen days, and made it.

The time of the Smith brothers, Sir Ross and Sir Keith, was twenty-eight days. They travelled in a heavy machine.

Six and a Half Dozen

Mr. Hawkins was an argumentative local councillor, and was crushing an opponent's case. "Gentlemen," he said, "you may say with Councillor Smith, that this is a case of six of one and half a dozen of the other. But I say, no, No!—pause for emphasis—No! it is nothing of the sort. It is exactly the contrary."

Tomato juice has been found equal to orange juice in preventing scurvy among children.

INTRICATE CLOCK AT GREENWICH

Accurate Time Keeping Device Has Free-Swinging Pendulum

Has man at last achieved a time-keeping machine able to compete with the natural laws of the heavenly bodies? Professor de Sitter, of Leyden University, in a special contribution to "Nature," the scientific journal, suggests that this is possible. He calls attention to wonderful clocks at Greenwich Observatory known as free pendulum clocks. Humanity has been looking for the super-clock, and in the clock known as "Shortt 3" the professor thinks it may be found.

"One of these clocks," he said, "has been left entirely to itself, being, however, under rigorous control at the Observatory at Greenwich, during the greater part of the year, and its rate has been absolutely invariable. It looks as if this clock could be depended upon to keep time within a few hundredths of a second for a period measured in years instead of weeks."

They have three of them, Shortt 3, their standard timekeeper; Shortt 11, which is used in emergency, and Shortt 16, which is used for the wireless signals.

"Recent tests," said the official, "have shown a daily rate remaining constant for more than six months to the order of one-thousandth of a second, and we believe it an advance on any clock previously made. It was constructed to the design of Hamilton Shortt."

"In an ordinary clock the pendulum has a certain amount of work taken out of it before it can get its pulse to continue its swing. A free pendulum clock has no work to do."

"It is a master clock that has a slave clock to work for it. The actual impulsing lever is released electrically by what is termed the slave clock. In its turn the master clock synchronizes its slave."

"This wonderful type of clock has no hands, no face, and shows no time to passers by. It is simply a master pendulum."

"In an hermetically sealed copper cylinder this robot finger silently marks off the passage of time in space. All its connections are electrical. Its motive power is gravitation."

Flag Over Admiralty Is Never Lowered

Always Kept Flying By King's Decree Says Secretary

Do you know why the flag which flutters over the Admiralty in Whitehall is never lowered?

This question was asked by one who noticed that during the funeral procession of Earl Hald, while all other flags in the neighborhood were at half-mast, that of the Admiralty was at mast-head.

When approached on the matter members of the Admiralty staff confessed their ignorance on the point. One suggested that it symbolized the fact that the British Navy never surrendered.

Sir Vincent Baddeley, First Principal Assistant Secretary to the Admiralty, finally solved the problem. "The flag is never hauled down," he explained, "because Board of Admiralty never ceases work day or night. King Edward as the head of the Navy, commanded that the flag should always be at mast-head, and it always is."

The flag's design is that of a gold anchor on a red background. It was originally introduced by James Duke of York, afterwards James II., as Lord High Admiralty and Lord General of the Navy, and was adopted by the Lords Commissioners in 1725.

The Hostess—"Are you fond of lobster salad, Doctor?"

The Doctor Guest—"No, I'm not fond of it, but I'm grateful to it."

Soft coal smoke in Chicago costs the city millions every year.

Rations For Big Egg Yields

Necessary To Follow a Very Careful System Of Feeding

Some excellent egg laying records have been made at the Lettbridge, Alberta, Experimental Station. A record of three hundred eggs was made by one hen, while twenty-seven produced two hundred and fifty eggs or more, and one hundred and four exceeded two hundred eggs in the year. To obtain such records it was necessary to follow a very careful system of feeding. The winter scratch ration was made up of two parts of wheat and one part each of cracked corn and crushed oats. A very small portion of this feed was thrown in the litter in the morning to start the birds exercising. The balance of the scratch feed was given about one hour previous to the birds going to roost. A dry mash which was available to the birds at all times, was composed of equal parts of bran, shorts, wheat, middlings, corn, meal, oat chop, and meat meal, with a very little fine salt and charcoal added. The birds were also fed a moist noon meal consisting of a crumbly mash made with the same ingredients as the dry mash, with the meat meal, salt and charcoal omitted. This noon meal was omitted on occasional days according to the judgment of the feeder, who aimed at all times to keep the appetites of the birds keen. The flock was also given green feed, such as cabbage, alfalfa, mangels, turnips, beets, and sugar beets. With the arrival of spring growth the birds had the liberty of the runways that had been seeded with a mixture of wheat, barley and oats. The report for 1926, available at the Publications Branch, Department of Agriculture, Ottawa, further states that the summer scratch feed was changed gradually to five parts wheat to one each of cracked corn and crushed oats.

King Richard Lost Chance

Sold Small Possession and Was Not Commemorated In Stamps

A special stamp is to be issued to celebrate the jubilee of the British occupation of Cyprus, an island whose history goes back to the fifth century B.C., and which is richer in mythology than any other British possession. But what about celebrating the first British occupation?

Nearly eight centuries ago Richard I., while on his way to the Third Crusade, encountered a storm which blew his ship in one direction, while that in which were his future Queen and his sister was becalmed off Cyprus. The self-styled Emperor of the island came down to the shore and tried to cajole the women into landing, and, just as they were becoming thoroughly frightened, Richard arrived.

He demanded an apology from the Emperor, and, receiving none, assembled his attenuated forces, landed, and conquered the island, and imprisoned the discourteous ruler. But Richard had no use for his new possession, and, being in need of funds, sold it to the Knights Templar and proceeded to the Holy Land. Thus he lost his chance of being commemorated in a stamp.

Learn Lesson From Bass

If People Persist Obstacles To Success Usually Disappear

A story is going the rounds of a man who had a fish-tank divided into two sections by a glass partition. In one side he put a lively bass; in the other number of minnows.

Every time a minnow came up to the glass portion the bass made a strike. Then, with a bruised head, the bass got discouraged and waited patiently each day for the food dropt in from above.

The man took out the partition. The minnows swam around the bass and were not touched. The bass was thoroughly sold on the idea that business was bad.

Take another lunge at the glass partition. It isn't there.

Norse Convention In Winnipeg

The following Norse organizations in Canada and the United States are planning a great joint convention and reunion to be held in Winnipeg, July 5-10, next: League of Norsemen, Norwegian Bygdinger, Norwegian Singers, Danish and Norwegian Press Associations, Norwegian Lutheran Church. Committees are now making arrangements for the gathering. Large delegations are expected from the South.

It isn't in my of the records that a great masterpiece was ever created in the presence of the genial caller who plunked himself down beside the writer's desk and remarked, "Don't let me interrupt you go right along with your work."

TWO HUNDRED TRACTORS

To be exact—208. This, the largest shipment of farm implements ever to cross the prairies, was carried through Winnipeg into Saskatchewan and Alberta by the Canadian National Railways. There were 52 cars, with four tractors to a car. The photograph was taken at Melville, Sask. The distribution of the implements was made chiefly from Humboldt and Melfort, Sask., but some of them travelled as far as Edmonton. Canadian National officials regard this movement as an unmistakable proof of the growth and prosperity of the west. The train attracted a great deal of attention all along its route.

Commander Byrd Sketches Plans For His Proposed Dash To The South Pole This Fall

Reclining in an easy chair at the Governor's mansion at Richmond, Virginia, Commander Richard Evelyn Byrd pictured the time when he would be camped on a stationary iceberg, 2,300 miles from the nearest human dwelling, on his projected exploration trip to Antarctic regions.

Commander Byrd said his expedition would sail south in September, 1928. He expects to return by June, 1930, though there was a possibility, he said, that he might be delayed a year.

New Zealand is to be the first stop of the adventurer and his men. Then comes the voyage for the Ross ice barrier, 2,300 miles to the south.

The main base of the expedition will be at the Bay of Whalen, where Amundsen had his headquarters, according to present plans.

"This is 2,300 miles from the nearest human dwelling—the farthest people have ever lived from civilization," Commander Byrd said, "and there we shall establish a small village."

"After making camp, we shall establish several sub bases about 100 miles apart on the way to the South Pole. These will be necessary, for in the event of a forced landing we shall be able to hike to a food supply."

"The final flight to the Pole will be the most hazardous. In addition to the radio, we shall use a kite to keep in touch with the last base. As the South Pole is on the last plateau, 10,000 feet high, landing will be difficult. The air at the height of two miles has lost so much density that it requires a great deal of power to take a plane off the ground and we shall land with at least 1,200 gallons of gasoline and 1,000 pounds of emergency equipment. Our landing speed must be fast."

For the flight to the Pole a big monoplane with three engines and a wing spread of 76 feet, probably will be used, the Virginia aviator said. In addition, the expedition will carry two single engine monoplanes of the type used by Chamberlain on his trans-Atlantic flight. Radio will be used to keep in constant touch with civilization and an "ice ship," with a bowled hull and two projecting timbers to push aside floes is being constructed. Fifty-four men, including a dozen experts, will make the trip. Floyd Bennett, who accompanied Byrd to the North Pole, will be second in command.

Maps of the polar regions will be made of everything encountered and the scientific data brought back to civilization. The frozen area to be explored is larger than the United States and Mexico combined.

"Science is the loser so long as there is a large, unexplored area in the world," Byrd said. "This trip is primarily for scientific purposes and I regard whatever hazards encountered as justified by the increase in man's knowledge which the expedition will make possible."

When White Pine Was King
The early history of the lumbering industry in Canada is practically the history of the lumbering of white pine. In the early days of lumbering, the white pine was considered the mate, if not the only, tree of value in the forests. It was the premier lumber tree, and for years held first place as lumber-producer both as to quantity cut and the value of the product.

Million Bushel Elevator At Coast
A contract has been awarded for the construction of a million bushel grain elevator for the Fraser River Elevator Company on the Fraser River near New Westminster, B.C. The elevator will be located on the south side of the river on a spur of the Canadian National Railways. The contract price is \$450,000.

"Are you going to spend the winter here?"
"No, I ought to have gone three months ago, but I have been afraid of seeing the bill."—Journal Amusant, Paris.

To Improve Quality Of Canadian Barley

Conference In Ottawa Attended By Representatives From Prairies

Preliminary steps for improving the quality and broadening the market for Canadian barley were taken at a conference held here in Ottawa under the direction of Dr. J. H. Grisdale, deputy minister of agriculture. All the prairie provinces were represented.

A committee has been appointed to investigate the question of securing the varieties and strains best suited to the different localities where barley can be profitably grown.

The committee includes L. S. Newman, Dominion cerealist and Professor T. J. Harrison, of the Manitoba Agricultural College, Winnipeg.

A seed committee also was appointed with Major H. G. L. Strange, of Fenn, Alta., as a member, while a barley markets extension committee was formed, composed of L. H. Newman and Professor Grant, of Winnipeg.

Several of the delegates stressed the importance of barley growing where wheat and oats could not be successfully produced, and recommendations made for adopting new barley grades. A committee was appointed to see what could be done to secure amendments to the Canada Grain Act which would provide grades for malting barley.

Not His Business

He was a hot-headed lad, and when he joined the army it was not long before he found himself in serious trouble. Accordingly, he was hauled up next morning before the C.O.

The usual preliminaries were gone through, when to the amazement of everyone the recruit commenced a lengthy speech in his own defense. "Silence!" roared the adjutant. "Shut up yourself!" retorted the recruit. "It's the old boy in the chair I'm n-talkin' to, not you!"

The smartly simple frock pictured here is suitable for many occasions. There is a circular inset at each side of the skirt, a V-shaped neck finished with applied bands and long dart-fitted sleeves. No. 1719 is for ladies and misses, and is in sizes 16 years, 36, 38, 40 and 42 inches bust. Size 38 requires 4 yards 36-inch, or 2 1/2 yards 54-inch material. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical style, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

LARGER EQUIPMENT REDUCES FARM LABOR

Farmers Should Keep This In Mind When Replacing Implements

The economical use of farm labor is essential to profitable farming. Labor is often heedlessly wasted because farmers have not calculated the hours of manual labor that they could save by using, on farms having a sufficient acreage, implements drawn by three or four horses instead of two, says an Experimental Farms Note.

In many cases the time of a man could be saved by using, for example, a two or three-furrow plough, multiple section harrows, or a double cultivator. For the cutting and hauling of hay or grain, much labor could be economized through the use of larger implements, as these implements are ordinarily used during several days each year.

On a 200 acre farm where a 5-year rotation is followed and of which 15 acres are seeded to corn or other hoed crops, 65 acres to grain and 80 acres to hay, an average of 800 to 850 hours of man labor equal to 80 to 85 ten hour days can be saved yearly solely through the use of more powerful implements.

The labor which is saved could be used for other lines of work which are often neglected because of the lack of time, or the tilled area might be extended and thus increase the farmer's income. In most cases it would not be necessary to increase the number of horses on the farm for such a change.

It is readily understood that the farmer who already owns a complete set of agricultural equipment is not ready to sell it as a whole in order to buy larger implements, but as he gradually replaces his equipment, he would be wise to consider the advisability of buying, even at an increased cost, three or four-horse rather than two-horse machines.

A Dual Source Of Wealth

Coal Mines and Clay Deposits In Southern Saskatchewan

A new coal mine has been opened up recently in the Estevan district, Southern Saskatchewan. The coal seam is several feet deep and carries an overburden of valuable commercial clay. The mine is being operated by a force of practical miners, and the coal retails at \$3 per ton to local farmers who haul it from the pit. Clays from twenty-two different deposits in Southern Saskatchewan are now being tested at the laboratories of the provincial university to determine their suitability for the manufacture of whiteware. This classification includes such products as household ware, electrical porcelain and floor and wall tile.

Gold production from the mines of Northern Ontario in 1927 totalled \$33,409,247, an increase of \$2,400,144 over 1926. The Province of Ontario is now the principal gold-producing centre in Canada, with British Columbia next in importance. A small quantity is produced in Nova Scotia.

It's twice as easy to deceive one's mother as it is any other person.

You can't stretch your word far without breaking it.

Care Of Breeding Turkeys

Important To Commence Feeding For Egg Production At the Right Time

To get turkeys laying at the proper season requires experience. It is important to know just when to begin feeding for egg production. According to a Dominion Department of Agriculture bulletin on the "Care and Management of Turkeys," forcing for laying should be begun as soon as the weather becomes really springlike and laying should commence about the middle of April in Eastern Canada and somewhat sooner in the West, especially in British Columbia. Eggs laid too early have to be held too long before setting.

When the spring feeding starts the breeding turkeys should be given grain twice daily, morning and evening, and at noon a feed of wet mash composed of equal parts of bran, shorts, ground oats and cornmeal with sour skim-milk to moisten. Only the quantity that the birds will clean up readily should be given at each feeding. The noon mash should be started about a week later than the extra feed of grain. It is assumed that the turkeys have received only one feed of grain daily during the winter. Grit and oyster shell should, of course, always be provided.

Egg Hatching

Interesting Hatching Results Obtained At Agassiz Experimental Farm

At the Experimental Farm at Agassiz, B.C., where so many world's records were made with high producing hens in 1926, some interesting hatching results were obtained in the spring of that year. They are detailed in the latest report of the Superintendent, available at the Publications Branch of the Department of Agriculture at Ottawa, and, of course, apply mainly to conditions in British Columbia. Hatching commenced towards the end of February and was continued to the end of April. The percentage of fertility during March was 81.2 and in April 81.6. Of the total eggs set during March 41.6 per cent. hatched as compared with 41.4 per cent. in April. Of the fertile eggs March recorded a 45.6 per cent. hatch compared with a 50.5 per cent. hatch in April. Hen eggs were 82 per cent. fertile against a fertility of 72 per cent. in pullet eggs. The number of chicks alive when wing-banded was 83.6 per cent. from hen eggs and 83.1 per cent. from pullet eggs.

Will Drill For Oil

The Hudson's Bay-Maryland interests, which had several exploration parties working in various parts of Alberta and Alberta's northern hinterland last year, will drill for oil in the Viking field from which Edmonton's natural gas supply is drawn. Plans call for drilling to a depth of 4,000 feet. The North Western Utilities, a subsidiary of the International Utilities Corporation, will drill two more gas wells in the Viking area.

Highest Peak In Canadian Rockies

The highest peak in the Canadian Rockies is Mount Robson, in British Columbia, on the line of the Canadian National Railways. This mountain has an elevation of 12,972 feet above sea-level.

Fame Of The Dominion As An Ideal Vacation Land Has Been Spread Far And Wide

Much has been said in recent years relative to the variety and extent of Canada's recreational resources. The annual national income derived from such resources, although hard to estimate accurately, is one which compares favorably with the annual values of the products of her forests, of her mines, fisheries or any other industry. In addition to keeping abreast with other progressive countries in the field of commercial activities, Canada has established a world-wide reputation as being a charming holiday land where practically all forms of recreation are available at moderate cost to the visitor. There are few records in the annals of Canadian development more interesting or more remarkable than those of the manner in which the economic importance of the Dominion's recreational features has grown in recent years.

Not the least among the many changes in the conditions of modern life are those resulting from the development of the automobile as a means of transportation. An amazing increase in the volume of holiday movement has been witnessed during the last few years and the automobile has played a large part in this regard; it is no longer considered a luxury of the rich but is rapidly becoming a necessity for the man in moderate circumstances.

Some idea of the extraordinary growth of the holiday traffic may be gained from a comparison of the records of touring automobiles entering Canada over a period of years. Between 1919 and 1926 the number of cars receiving permits to enter the Dominion for a period of 30 days rose from 59,000 to 550,000 and those entering for twenty-four hours increased from 177,000 to over 1,500,000. The number entering for a period of from one to six months also shows a substantial increase. Aside from the remarkable increase of motor tourists, railway and steamship lines each year add enormous numbers to the thousands who holiday in Canada. Including an even wider field than the automobile these organizations have spread the Dominion's fame as an ideal vacation land far and wide.

The vast numbers who annually visit Canada by automobile can find an opportunity to spend part or all of their vacation in territory extending beyond the usual avenues for travel. In keeping with the desire of many who wish to visit newer fields and in order to provide facilities for easy and convenient travel, motor highways have been constructed which now enable the tourist to reach beautiful lake and country, in some instances rarely explored. There are now over 150,000 miles of improved roads in Canada. In addition to this vast mileage, which is kept in good condition throughout the touring season and in some districts available to the motorist during the whole year, there are many thousands of miles of other roads quite suitable for general motor traffic. Leading to practically all places of interest in the populated areas of the Dominion these motor roads contribute largely toward the development of her recreational resources.

Few countries in the world possess such magnificent and diversified natural scenery or such inviting summer and winter vacation areas as Canada. Fortunately for the inhabitants of the large cities of America nature has bounteously provided immense playgrounds in her wide expanses of mountain, lakeland, forest, and river. National and Provincial parks covering an area in the neighborhood of 25,000 square miles and ranging from the Atlantic seaboard to the Pacific coast, are all easily accessible either by rail or motor road or both and provide the tourist with exceptional opportunities for varied recreation. The huntsman, fisherman, camper or canoeist will find in Canada's hinterland great stretches of primeval forest, rolling plain, and mountain range, the natural haunt of moose, deer, caribou, bear, bighorn sheep, mountain goat and other native game animals; beautiful lakes and countless swift-flowing rivers affording an opportunity for some of the very best fishing to be found anywhere in the world.

From a historical viewpoint Canada occupies a unique position among the countries of the world. Some of the most romantic and interesting episodes in the history of North America afford an extensive field for study to those interested in the early history of the continent. There still remain, in many districts throughout Canada, visible evidences of early conflict in ruins which have been preserved; and

there may be found original forts, blockhouses, powder magazines, guard houses and listening posts as well as other evidences of early important events which have direct bearing on the political, economic and industrial progress of the country.

Taking into account the scope and variety of the attractions found from coast to coast and from the International Boundary to beyond the Arctic circle, there is every reason for the view that the natural assets which have been indicated above will prove to be one of the major forces of Canadian development in the future.

Suffer From "Sea Hunger"

But Danish Settlers Soon Become Used To Prairies

"Danish settlers in the prairie provinces suffer terribly from sea-sickness—not, of course from heaving on the sea but from being absent from it," said Aksel Sandemose, novelist of Copenhagen just back in Montreal from a seven months' tour of the Danish settlements in the Canadian middle west.

In discussing his findings in the offices of the Department of Colonization and Development, Canadian Pacific Railway—where, apparently, he had dropped in for literature, maps, photos and things from the department's resources—Mr. Sandemose went on to explain: "This sea hunger—or, should I say 'thirst'—no that won't do either—but, at any rate this new and strange absence from the sea is experienced by practically all of the 30,000 Danish settlers in the West; for you must remember that it is almost impossible to live anywhere in Denmark without being in sight or sound of the sea, either the coast or bay or inlet."

"But," Mr. Sandemose hastened to add, "this sea-sickness gradually wears off, after a year or so, and once the settlers have dug themselves in and got used to the new horizon they do well, even in wheat growing, which is new to them, and very few of them return to the homeland."

Old Pawnshop In Paris

Is City Owned and Now Loans On Automobiles

The Paris "Monte de Piete," or city pawnshop, is 150 years old, but there will be no birthday party.

It is, officially, the Credit Municipal and unofficially "My Aunt," merely a change in gender from the American appellation.

Private pawnshops are forbidden in France and the public loan institutions are supervised by the authorities to insure honest and efficient administration.

Precision claims are accepted as collateral for loans at only 1 per cent. a year, but other loans are at 8 per cent. At Toulouse and other cities loans are made without interest.

The only innovation of recent years has been the acceptance of automobiles "in book."

Helping the Farmer In B.C.

Press despatches state that federal farm loan benefits are to be extended to British Columbia by legislation introduced in the provincial assembly on the recommendation of the agricultural committee. Loans will be obtainable on mortgage up to fifty per cent of appraised value of land and twenty per cent on buildings.

Served Eighty-Two Years

After serving 82 years with the same firm, John Hughes has just resigned as general works manager of George Saker & Co., manufacturers of weighing machines, at West Bromwich, England. He started with the firm at nine as an errand boy and served continuously until ill-health caused his resignation.

The summer descendants of a single fly will number 2,080,000.

"You seek a cashier? You had one a week ago!"
"Yes. I am seeking him also." — Pages Gates, Yverdon

ROYAL GIFT TO CANADA

The Bible which the Prince of Wales presented to Canada's national war memorial is seen reposing on the altar of sacrifice in the Victory Tower. Although the presentation was made upon the occasion of the prince's last visit to the Dominion, it was only recently that the gift was learned about, the memorial chamber in which it reposes being thrown open for inspection only on special occasions.

WORLD HAPPENINGS BRIEFLY TOLD

Canadian farm lands in occupation in 1927 are valued at an average of \$38 per acre in a Government crop report just issued.

The Winnipeg Presbytery of the United Church has adopted a resolution in favor of the ordination of women to the ministry.

Jules Cesare Joseph Laperte, a Belgian, accused of being a German spy during the Great War, was found guilty at Paris, and sentenced to life imprisonment in a fortress.

The Washington government appears unfavorable to any proposal for another conference of the great powers on naval disarmament before 1931.

Premier Taschereau brought a bill down in the Quebec legislative assembly which would grant municipalities the right to prohibit sign-boards advertising alcoholic liquor.

That the Canadian National Railways would, in the near future, purchase the Western Union Telegraph lines in the Maritime provinces, and add them to their own system, was the report current in Montreal.

Hon. T. M. Wilford, former Minister of Justice and leader of the New Zealand Liberal Party, arrived in Vancouver aboard the liner Aorangi, to make a study of Canadian conditions generally.

A. L. Jolliffe, chief commissioner of immigration, has left Ottawa for Great Britain to investigate the complaints which have come to the department in regard to the new medical inspection service. Mr. Jolliffe will be gone several weeks.

The population of Saskatchewan, as at June 1, 1926, was \$20,738, an increase in the five-year period from the quinquennial census of 1921, of 63,228, according to the report issued by the Dominion Bureau of Statistics at Ottawa.

Sores Eeze Before It. There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Eczema Ointment. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

U.S. Tariff Against

Canadian Cream

Increase Of Fifty Per Cent. May Go Into Effect Soon

"The United States tariff increase of 50 per cent. or perhaps less, against Canadian milk and cream will likely go into effect," said P. C. Armstrong, of Montreal, just back from Washington, where he represented the National Dairy Council of Canada at the United States tariff commission hearing regarding dairy products.

Mr. Armstrong stated that the methods used by the investigators of the commission in making comparative cost studies were not correct as regards Canada, and he was resentful against remarks made by some of the speakers at the hearing to the effect that the standard of living among Canadian farmers was not up to that of the United States farmer.

The Least Excitement Made Her Heart Palpitate and Flutter

Mrs. Ambrose Oser, Elginburg, Ont., writes: "I suffered for some time with a bad heart which seemed to be controlled by my nerves. The least little excitement would cause it to flutter and palpitate, and at times I would have real bad spells. I suffered in this way for some time when, one day, I saw

advertisized, so decided to try them. I had only taken a few boxes when I noticed that I felt better, so I continued taking them and in a short time my heart felt entirely different."

Price 50c, a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

W. N. U. 1724

Population Of Saskatchewan

Given As \$20,738 As At June 1st, 1926

The population of Saskatchewan as at June 1, 1926, was \$20,738, an increase in the five-year period from the quinquennial census of 1921, of 63,228, according to the report issued by the Dominion Bureau of Statistics today. In this total, males exceeded females by 72,134. The rural population of the province was more than double the urban, the figures being 578,206 and 242,532 respectively. The urban population were distributed among seven cities, 80 towns and 360 villages.

Nearly 45 per cent. of the population was born within the province itself, while of the \$20,738 persons in Saskatchewan, 624,548 were of British origin. Native-born Canadians comprised 525,372; those from the British Isles 98,041, and from other British possessions, 1,060.

Of the foreign-born citizens, numbering 196,190, or nearly 21 per cent., Russia was the largest contributor with 27,227. Austrians were second with 11,594, and Ukrainians third with 10,607. The province had 8,284 Gallicians, 7,356 Germans, 9,240 Norwegians, 7,282 Swedes, and 2,066 Danes. There were 3,158 Asiatics, of whom Chinese furnished 2,719 and Japanese 87.

Literacy was greatest among the foreign-born, there being 10.28 of the total over 10 years old without letters; Canadian-born furnished 2.95, and British-born, 21.

The Sun Life

More Firmly Established On A Sound Financial Basis Than Ever Before

One of the most encouraging signs of the times for Canada is the substantial progress that continues to be made by our great banking and insurance institutions. The Sun Life Assurance Company of Canada has done record business during the past year, and its position is today more firmly established upon a sound financial basis than ever before in its history. When Canadians reflect upon the strength and solidity of their banks, and their insurance companies, the desire that these shall always remain Canadian is uppermost. It is indeed in the highest interests of the nation that they should never pass under foreign control. Canada needs capital, but not to be devoted to swallowing up our national identity. — Montreal Star.

Winnipeg Newspaper Union

An Attractive New Frock

This dainty frock for the junior miss will be found quite simple for the home modiste to fashion. There are two gathered ruffles attached to a straight foundation, and the square neck and short kimono sleeves may be bound with matching or contrasting material. No. 1722 is in sizes 6, 8, 10, 12 and 14 years. Size 10 requires 2 1/2 yards 36-inch, or 17, yards 54-inch material. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical style, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

SCOTT'S EMULSION

Invention Of Canadian

Control Device For Airplanes Declared To Be "Fool Proof"

A variable pitch propeller, which is to an aeroplane what a gear shift is to the automobile, will be introduced to commercial aviation in the U.S. this year if the plans of W. R. Turnbull, Canadian inventor, are successful. Mr. Turnbull, who lives in Rothsay, N.B., but who is staying at East Orange, N.J., talked to New York papermen.

The device has been tested thoroughly by the Royal Canadian Air Force, he said.

Mr. Turnbull is negotiating with New York manufacturers for the national rights to his invention which is covered by patents and patent applications.

His method of varying the pitch of a propeller is to control the necessary gears by a small electric motor and a hand switch which makes the device "fool proof."

Turnbull, who has been working on his propeller twelve years, said the pitch could be changed from positive angles to negative angles so that the motor actually would back up, a feature of great value on airships. Mr. Turnbull says his propeller will add 70 to 100 per cent. to the climb of an aeroplane, thereby making it possible for commercial planes to carry less fuel and more pay load with greater safety and save 20 to 25 per cent. in fuel in long flights.

Diamond Cuts Were Costly

Replacing Three Plate Glass Windows Cost \$1,500

Three of the largest plate-glass windows in England are to be replaced along the Oxford Street frontage of Messrs. Peter Robinson, Ltd.

The windows, with two others of smaller size, have been slashed with a diamond, and in some places the 1/4 in. thick glass was cut completely through.

"It has become necessary to replace the windows," says an official of the Employers' Liability Insurance Corporation.

"Owing to the police regulations the week-end is the only time the work can be done."

"Three of the windows to be filled are the largest in England, each having a dimension of about 24 feet by 10 feet, and have had to be specially manufactured at a rough cost of \$100 a pane."

Round World Race

By Six Newspapers

European Press Celebrating Centenary Of Jules Verne's Birth

A globe encircling race between representatives of six European newspapers, which will follow the route of Phileas Fogg in Jules Verne's "Around the World in Eighty Days," will be a striking feature of the 100th anniversary of the birth of the imaginative French author, who was born in Nantes, February 8, 1828.

The participants who started March 6, were to choose their own means of transportation, but they must follow the route Paris to Brindisi, Suez, Bombay, Calcutta, Hong Kong, Yokohama, San Francisco, New York, Liverpool, London to Paris.

Colic.

Mix Minard's well with Molasses and use as a drench. Gives quick results.

Pres. Coolidge May Visit Canada

Possibility That United States President May Be In Ottawa This Summer

The statement contained in a United States magazine that President Coolidge may visit Ottawa this summer as a return courtesy for the visit of the Governor-General to Washington last fall, has aroused considerable speculation in Ottawa, says the Journal. In a news page story, it states that the president may lay the cornerstone of the United States Legation in Ottawa. It adds: "There has been no announcement from Washington concerning the president's plans, but it is believed in Ottawa that if he visits the Canadian capital, he will come during the summer."

"Only one president of the United States has visited Canada during his term of office. Warren G. Harding, it will be recalled, stopped at Vancouver shortly before his death."

Aviators Helped Motorists

Unusual Story Vouched For By Two St. Paul Men

If your automobile stalls, hail an aeroplane to pull you out. That's what two Wisconsin men did. The story is vouched for by Gene Shank and Paul Tontellotte, of St. Paul.

Dr. S. H. Holson and S. J. Fillman, of Plum City, Wis., were crossing the ice on Lake Pepin, near Stockholm, Wis., when their automobile broke through at a shallow place.

A short time later a plane, carrying the two airmen, passed overhead. The aviators were attracted by the two men waving their arms and the plane descended to the ice.

The airmen obligingly hooked up a chain from the plane's tail skid to the automobile and pulled the machine out. They hopped off again and related their story when they arrived at St. Paul.

Recipes For This Week

(By Betty Barclay)

WINTER CHOCOLATE

2 cups milk.
6 tablespoons cornstarch.
1/2 cup sugar.
1 1/2 squares chocolate.
1/2 teaspoon vanilla.
1/4 teaspoon salt.

Mix dry ingredients, make into thin smooth paste with a little milk. Add to heated milk in top of double boiler. Add melted chocolate. Stir to prevent lumps. Cook 20 minutes. Add vanilla and pour into molds rinsed in cold water. Chill, serve with cream or whipped cream.

PUFF-BALLS

1 egg white.
4 oranges.
1/2 cup powdered sugar.

Peel small oranges, removing white membrane with outer skin. Beat egg white, slightly, using wire whisk; add sugar, gradually, and continue beating until meringue is stiff and will hold its shape. Thrust a long slender wire skewer through the centre of each orange; frost them completely with the meringue, and suspend them, by the skewers, across a narrow pan, and bake twelve minutes in a slow oven, being careful not to let them brown. Twist skewers gently to remove them. These oranges make a pretty dessert or supper dish.

Testing Paper With Radio

Latest Use Was Accidentally Discovered By Radio Fan

One of the latest uses for radio is the testing of unmanufactured paper; it was disclosed at the annual paper and pulp convention held in New York.

A radio apparatus on paper machines, W. D. Somerville of Bangor, Me., explained, is used in his mills to test both weight and amount of moisture in the paper.

The instrument was evolved from an accidental discovery made by a radio fan who, in using paper to throw his set out of tune, learned that the thickness of paper and the amount of moisture had varying effects on his dial.

Art Is Dying Out

Cork cutting by hand is an art which is fast dying out, and only one hand cork-cutter, it is claimed, now plys his trade in London. He has been cork-cutting for just over sixty years. When a press reporter visited him he picked up a chopper the size of a meat axe and with it peeled a piece of cork as fine as an apple rind. "It is as easy as cutting butter," he said. He showed the reporter a picture which he had made, in cork, of Arundel Castle, Sussex.

Not more than seventy-five years ago a New England city passed an ordinance making it unlawful to use a bathtub without a doctor's prescription.

SUNDAY SCHOOL LESSON

MARCH 18

JESUS TEACHES SINCERITY

Golden Text: "Keep thy heart with all diligence; For out of it are the issues of life."—Proverbs 4.23.

Lesson: Mark 7.1-23.

Devotional Reading: Psalm 24.1-6.

Explanations and Comments

I. The Tradition Of The Elders Violated By The Disciples, verses 1-5.—Certain Pharisees and Scribes had come from Jerusalem for the express purpose, no doubt, of obtaining evidence which they could use against Jesus. They noted that the disciples ate food without first washing their hands, and one day they gathered about Jesus and asked him how it was that his disciples failed to follow the tradition of the elders, for they ate with hands defiled, ceremonially unclean because unwashed.

For the benefit of his Gentile readers, who were not familiar with Jewish customs Mark here in verses three and four gives parenthetically an explanation. Before eating the Jews washed their hands diligently (or, up to the elbow, Revised Version). This was not because the hands were actually unclean, but because they were ceremonially unclean. When they came from the market place, where they would come in contact with people whom they regarded as ceremonially unclean, they bathed before eating. They kept also all the regulations as to the washing of cups and pots and brazen vessels.

The Jews "held the tradition of the elders." Dr. Charles R. Erdman recalls the story of an imprisoned rabbi who was allowed the most meager amount of bread and water for his daily ration, and who used the water for bathing his hands instead of drinking it, saying that he had rather die than transgress the institutions of his ancestors.

"Fundamentalism is easily awakened in the defense of Tradition. In the Church of Rome the ecclesiastical regulations, e.g., the fasts and feasts, or the celibacy of the clergy and the monastic vows, are enforced with a greater severity than the original requirements of the Gospel. The Roman Church, accepting the precepts of Tradition, has made the precepts of men into doctrines to such a degree that the New Testament is rightly regarded as a danger to the laity. A passage like the one before us is subversive of Roman teaching."—R. F. Horton.

Rushing Work on H.B. Road

Good Progress Has Been Made During the Winter Months

Work has been prosecuted all winter on the railway now under construction from the Hudson Bay Railway to the Flin Flon mining area in Northern Manitoba, and railways have been laid for a distance of thirty-five miles. It is stated that the survey of this line will be continued to Cold Lake, a distance of twenty-five miles beyond the Flin Flon Mine, with the intention of extending the road to that point. The line to Flin Flon is to be completed for operation by December 31. Work on the Hudson Bay Railway from Limestone Rapids to Fort Churchill has also been carried on during the winter, and good progress has been made in clearing the right-of-way and getting things in shape for an early start by the graders. Work on the harbor at Churchill has also been going on all winter, so that there will be permanent docking accommodation for ships by the time the railway has been completed.

Standard Of Safety High

Comparison Between First Railroads and Modern Airplanes Is Interesting

Considering the short history of aviation, the standard of safety today is very high. Two reports from England, one this year, the other eighty-five years ago, offer an interesting comparison of the safety of railroads at the beginning of their development as compared with the airplane. According to a recent announcement Imperial Airways, Ltd., carried 52,000 passengers over 2,000,000 miles in 1927 without injury to a single passenger.

On June 14, 1842, the London Times stated: "The number of passengers carried on the eight railway lines numbered 10,508, the distance 3,562,338 miles yearly. In this time only fifty-six passengers were injured, of whom twenty-two were killed."

Idea Was General

Pat Murphy was taking his first flight in an airplane. The pilot was taking him over New York City. When they were about three thousand feet the plane suddenly went into a nose dive. "Ha, ha!" laughed the pilot, shouting to Pat. "Fifty per cent. of the people down there thought we were falling." "Sure," admitted Pat, "and fifty per cent. of the people up here thought so, too."

The province of Alberta now has a main highway system extending over 2,500 miles and a secondary road system of 11,000 miles, a large percentage of which is standard grade roads.

Buy Trees Direct

We grow our own nursery stock and sell direct to you—no salesmen, no agents, no costly commissions that you have to pay for. Our sales plan saves money—You can buy your plantings direct from us and save up to 25%. Nothing but high grade, No. 1 stock, of most standard varieties suited to Canadian conditions. All stock guaranteed true-to-name.

Grow Your Own Fruit

Plant fruit trees and berries this Spring—before you know it they will be producing delicious crops for table use and canning.

ALBERTA WOMAN WINS SCHOLARSHIP

Member Of University Of Alberta Teaching Staff Is Active Botanist

Miss E. Silver Dowding, B.A., M. Sc., a lecturer in botany, University of Alberta, Edmonton, is the winner of the \$1,200 scholarship offered by the Dominion Federation of University Women.

Annually the federation arranges to present a scholarship to the woman applicant whose accomplishment and abilities indicate that she would make the best possible use of the scholarship that enables her to continue her post-graduate studies for a year.

Miss Dowding received her high school education at Calgary, later going to Edmonton, where she attended university. She has been a member of the teaching staff of the University of Alberta for four years, and is regarded by many as one of the most active of the younger Canadian botanists. She has published a substantial number of articles on botanical subjects and in the last six years has carried on observation work in Alberta and B.C.

From the National Research Council Miss Dowding was given a grant this year to aid in the study of pine trees and vegetation in sandhill areas. The Royal Society, London, supplemented the grant. Her discoveries along this line are being put into form for publication.

To carry on her botanical studies at University College, London, is Miss Dowding's desire, and to prepare her thesis for a Ph.D. degree.

The demand for good advice is not equal to the supply.

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Preliminary and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste, it's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhoea; or need to aid sound, natural sleep.

Just one warning: It is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer is going to test them! Besides the book on care and feeding of babies that comes with Fletcher's Castoria in worth its weight in gold.

Children Cry for

Headaches may be swiftly and safely relieved by an Aspirin tablet. A most efficient remedy, and there's no after effect; its use avoids much needless suffering. Try it next time; see how soon its soothing influence is felt. Just as helpful when you have a cold; neuralgia, neuritis, rheumatism, lumbago. Just be certain you get real Aspirin—the genuine has Bayer on the box, and on every tablet. All druggists, with proven directions.

**Physicians prescribe Aspirin;
it does NOT affect the heart**

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

CHAPTER XX. (Continued.)

The madness that came over Helmi made her sway uncertainly, but she caught the back of a chair and managed to say, "Oh! it is all right; Jack left me lots of money; I really do not need it. I just thought I had better take it with me." She was holding her lips very tightly so they would not tremble. She even smiled, winking very quickly to keep the tears back. "I expect to meet Jack in the city," she resumed. "He has forgotten to mention to me that he sent for the money—but it is quite all right. I have plenty. Goodbye, Mr. Hamilton. It looks like snow, does it not?"

Helmi turned away quickly. "The timekeeper called her back. 'Say, Helmi,' he began awkwardly, 'don't think I am bawling in or the like of that, but I just wanted to say to you wise. That old bird of a magistrate at Bannerman has been shootin' off his mouth. It seems he claims he knows a lot about you. He says—Oh, well, I don't need to repeat what he says. He is drunk most of the time, and nobody should mind a word he says; but he declares you and Jack ain't legally married at all, and he insinuates that Jack sort of tipped him off. Oh, I don't know the ins and outs of it, but I just wanted to warn you to hang onto your certificate, and then in case of a frame-up you have the deadwood on them all. You have the certificate, have you not?"

CARRIED WIFE TO BED

Suffered So She Could Not Walk. Restored to Health by Lydia E. Pinkham's Vegetable Compound

Mining, Ontario. "I am a practical nurse and I recommend Lydia E. Pinkham's Vegetable Compound to suffering women. For three months I was almost helpless and could not sit at the table long enough to drink a cup of tea. Many a time my husband carried me to bed, I would be so weak. Then he read in the paper of a woman suffering as I did who got better after taking the Vegetable Compound, so he went and got it for me. When I had taken three bottles I was just like a new woman and have had splendid health ever since. When I feel any bearing-down pains I always take it; sometimes a little bottle or whatever I need. It is my only medicine and I have told many a one about it. Any one wanting to know more about Lydia E. Pinkham's Vegetable Compound, I will gladly write to her. I do all I can to recommend it for I feel I owe my life and strength to it." —Mrs. NEAL BOWSER, R.R. 1, Mining, Ontario.

Do you feel broken-down, nervous, and weak sometimes? Do you have this horrid feeling of fear which sometimes comes to women when they are not well? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and if taken regularly and persistently will relieve this condition.

W. N. U. 1721

mi, knowing what was in her heart, and the hopelessness of the quest, endeavored to keep her, but she knew she was hating her for holding her back from her only chance. At last, with her heart sore for the dog's trouble, as well as her own, she tied a thick piece of bacon to her collar, knowing she would break the string with her paws when she wanted to, then opened the door and let her go. She ran straight to the station, whimpering excitedly. From there she ran yelping down the track with her nose to the ties.

Helmi watched the poor animal until a bend of the road hid her from sight. Then she turned back into the darkened room sobbing. "Poor dog! poor dog! just like me, forsaken. Men who go away should shoot all of us who love them!"

Helmi hired a horse and buggy the next day and drove down the valley to Bannerman. She would know all there was to be known. She would find out what the magistrate meant.

It was a glorious day of blue sky, with a high wind that came booming through the pass in the mountain, roughening the deep pools of the river as it rasped over them. Helmi loved its cool breath on her hot face. She could not be cast down on such a day. Her Jack had not fooled her—no matter what any one thought. Helmi told herself again and again that her great fear was that something had happened to him—her dear Jack, so white-skinned, clean and gentle.

Anyway, she would be brave. Next day was train day, too, and he might come. Twice a week the train came down to Eagle Mines from the main line. Helmi had so often watched it coming in, her heart in her mouth, that she had grown to dread train days, for during the last few months at the first ragged whistle that came yearly piercing the valley a violent nausea had seized her. As she now drew near her destination it came again. She thought of the Wymuths and their awful philosophy. Was all this part of her punishment? Was it all wrong? Had she done wrong? But still, everyone who was in the world had come the same way. Surely God wanted people, and yet, why did he punish women so? She sat still a while, letting the horse feed along the side of the trail.

The magistrate was at home. No, he did not remember her. Helmi Milander, a Finn girl, whom he had married to Jack Doran last March? No, he did not remember. He and his friend, Major Gowsett, looked at each other. The magistrate winked knowingly. "I think you are mistaken, girl," he said sternly.

Helmi handed him her certificate. "You gave me this paper," she said. "The magistrate addressed his friend. 'There's only one way to settle this, I'll look up the record. If I married her to this young man the record will show. A certificate tells nothing. Anyone can buy a certificate and fill it in.'"

He went to a dusty cupboard, whose open door revealed only a row of bottles, brown, with gold labels, gleaming evilly through the gloom of the room. With difficulty he found his record book and spread it before him on the littered table.

"You said March of this year?"

"March the twenty-first," said Helmi, breathing quickly.

The pages were turned slowly.

"I married no one on March the twenty-first," he said, looking around at her over his glasses.

"Look at other dates, then," said Helmi, trembling; "I may be wrong."

The two military men regarded her closely. "You are wrong more ways than one," said the magistrate, slowly. "Look-see for yourself—there is no entry of any marriage."

A sudden fury came over Helmi. "You were drunk that day," she cried. "You were red-eyed and staggering! You forgot to write it down. You sent me out. You spoke to my Jack here while I sat outside. You mind I said 'Come outside to marry us.' You were cross and swore."

Major Gowsett interposed. "Hush, girl," he said, "you must remember Col. Blackwood is a magistrate. Your condition makes you hysterical. We're

The quickest and most effective relief from lame back and all kidney and bladder troubles is GIN PILLS. They promote health by restoring the kidneys to their normal action of filtering the poisons from the blood.

50c a box at your druggist's

No high-grade tea can be expected to retain its full flavor and strength unless packed in moisture-proof, metal-lined containers. Successful tea planters ship their tea in aluminum—the same rust, dust and damp-proof material which keeps Red Rose Tea always so fresh, strong and flavory.

sorry for you, but you must not speak like this."

Col. Blackwood said not a word. He went again to the cupboard, and after fumbling among the papers there brought back a newspaper slightly yellowed. "I'll show you something, you helmit," he said, slowly, taking his pipe from his mouth and laying it carefully on the windowsill.

(To Be Continued.)

Flin Flon Development

Expectation That Mine Will Be a Steady Producer By Fall Of 1930

Steady production of copper, zinc and gold at the Flin Flon mine may be expected by the fall of 1930, if all plans work out as expected, according to R. E. Phelan, vice-president in charge of operations of Flin Flon Mines, Ltd. By that date he estimates that \$10,000,000 will have been spent on the mining plant and smelter alone.

The capacity of the mill and concentrator will be 3,000 tons daily, and the smelter will be large enough to handle the product of this plant, Mr. Phelan said. This will mean steady employment for 1,000 or 1,200 men. The town which will spring up round the mill will have about 6,000 inhabitants, he estimated.

While the final decision regarding the location of the town site has not been made, Mr. Phelan was able to say definitely that it would be in Manitoba. The mine itself straddles the Saskatchewan-Manitoba boundary.

By the end of the winter of 1928, Mr. Phelan said, it was expected the railroad would be put in such shape that cement and structural steel could be run by rail right to the mine, while by the end of the summer of 1929, he predicted that a permanent roadbed would be laid down and all year round railway transportation possible to and from Flin Flon and The Pas. In that year, he said, the heavy plant and machinery would be shipped in, and the final construction and installation of the plant and smelter would be made.

Another Medical Triumph

Toronto Doctor's New Treatment For Pyorrhea May Effect Cure

Announcement is made that, after a long period of study and experiment, a Toronto doctor, working in the research department of the Western hospital, has developed a new treatment for pyorrhea, with a fair prospect of having discovered a cure for that disease. The successful physician is Dr. L. E. Harriman. If the hopes aroused by his discovery prove well founded, his achievement will be hardly less important than the insulin treatment for diabetes, developed by Dr. Banting.

Pyorrhea is a very common disease. It is said to affect fully 90 per cent. of all adults at some time in their lives, and that 50 per cent. of all teeth that fall out are lost through its morbid action. Not only is it a distressing affliction in itself, but it is the cause of many other disorders, for pus discharged from the diseased gums is absorbed into the blood stream and is an active cause of rheumatism in different forms, neuritis, ulcer of the stomach, and gall-bladder disease. Therefore a cure for pyorrhea may operate also as a cure for a long train of physical afflictions.

The men who bestow such boons upon suffering humanity are among the greatest benefactors of the race.

A Blessing In Disguise

Accident To Canadian Aviators May Focus Attention On Requirements In Hudson Straits

The accident which befell the Canadian aviators, Lewis and Terry of the Hudson Straits air patrol, was a blessing in disguise if it served to focus public attention on the work of the Canadian Government in the Arctic and the efforts being made to open a new outlet to Europe. In the opinion of Captain J. E. Bender, veteran government Arctic navigator.

The experiences of the armen threatened the necessity of a radio direction finder on the Button Islands and the reliability of the Eskimo for guidance, Captain Bender said.

Two American towns are named after Rudyard Kipling.

Minard's Lament—Invaluable in the Stable.

Russia's "Man Of Steel"

Man Who Captured Leadership Has Become All-Powerful

Joseph Stalin, the Russian "Man of Steel," who is holding that troubled empire in his hands today was born in the year 1879, and his real name is said to be Dyugashvili or Dzhoogashvili. Probably he changed it because he preferred one easier to pronounce.

He comes from fighting stock, says an article in the London Daily Mail by Dr. Edward Luboff, an eminent chronicler of Russian affairs, who has known Stalin since his boyhood days.

Today he is all-powerful, not only because the Army and the Cheta are at his command, but because at the first sign of anti-Stalinism he puts into motion the party machine, which declares every opponent of Stalin an enemy of the party and of the Soviet State. As for his personal safety of late he has imported a whole regiment composed chiefly of Caucasian brigands. And it may be added that the Georgian brigands will fight to the death for the safety of a descendant of one of their comrades who has managed to conquer Russia.

U.S. Investment Abroad

World's Debt To the United States Reaches Huge Total

The world's debt to United States investors, approximately \$25,000,000,000, is more than \$5,000,000 greater than was owed to Great Britain, when British foreign investments were at their peak, Dr. Max Winkler said in a report prepared for the Foreign Policy Association.

Exclusive of the so-called political obligations held by the United States Government, American investment in foreign securities in the first of the year aggregated about \$14,500,000,000. American holdings in Europe, approximately \$4,327,000,000, exceeded those in any part of the world. Canadian holdings by Americans are about \$3,822,000,000; South American, \$2,446,500,000; Central American, \$2,924,600,000; Far Eastern, \$270,500,000, and miscellaneous, \$53,400,000.

MARCH WEATHER DANGEROUS TO BABY

Our Canadian March weather—no day bright, but sloppy, the next blustery and cold—is extremely hard on children. Conditions make it necessary for the mother to keep the little ones indoors. They are often confined to overheated, badly ventilated rooms and catch colds which rack their whole system. To guard against these colds and to keep the baby well till the better, brighter days come along, a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach and bowels working regularly. The Tablets are a mild but thorough laxative which never fail to regulate the stomach and bowels and thus they relieve colds and simple fevers and keep the baby fit. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Gold Discovery In B.C.

During development operations on the Vahlalla-Klenzner mineral claim near Usk, Central British Columbia, high grade quartz showing much free gold has been disclosed in two parallel tunnels about 30 feet apart. The veins are from two to four feet wide.

A fore-and-aft rigged vessel, originally of two masts, but later with as many as seven, is called a schooner.

On fishing trips take Minard's.

News Notes

The Sugar City Golf Club was organized last Monday at a meeting held in the Standard Bank. Mayor P. W. Cope was elected honorary president, C. C. Watson, president, Dr. G. W. Leech, vice-president, and T. L. Halpin was appointed secretary. The executive committee consists of H. Hodge, Dr. H. H. Heal and D. C. Peterson. Plans for this season's activities will be commenced soon. Those interested in the game should see any of the above officers.

Local school children are to be vaccinated against small pox today. Where parents object to having their children vaccinated those pupils will be kept under quarantine for several days.

News Notes

T. R. Stone, prominent Calgary horseman, has added two more thoroughbreds to his string, having claimed Ancient Weapon at Tijuana recently for \$2000 and purchased Teddy Loumy, a full brother of Yorkhome, another Western Canada bred, from T. B. Jenkinson.

Ancient Weapon was formerly known as Silent Weapon and is a full brother of Silent Partner, Silent Stranger and other James T. Clarke colts. He won the \$2500 handicap at Winnipeg last spring.

FOR RENT—Two, three or five rooms. Close in. Apply to Mrs. Jane D. Collett, Raymond.

Miss Lucila Mehew and Miss Lily Shaw left on Thursday for Calgary.

LEE'S COLUMN

Hello Folks—

GOLD!

And with gamblers, outlaws, crooks, rousing the sleepy little town to activity, THATS—"UNDER THE TONTO RIM." Written by a man who knows the West, Zane Grey. Doesn't that sound interesting? And listen, it is good. But, piffle! who ever heard of a poor Zane Grey picture? "Under the Tonto Rim" is showing tonight and Saturday, with two shows Saturday night starting at 7 o'clock. Matinee at 3 p. m.

Due to the fact that the stake M. I. A. will present their play next Monday the Rex, in a spirit of co-operation will be dark.

Haven't you been anxious to see our "good luck" star Tommy Meighan in a role similar to the one he played in "Manslaughter"? Well we've got it—"The City Gone Wild", his latest vehicle, a crashing crook melodrama. I know you'll be wild about this one.

Weather Forecast—Rain or sleet, storm or heat, don't miss "Under the Tonto Rim" tonight.

Adolph Zukor, president of Paramount Pictures should pay me for the amount of publicity I give his pictures and film stars, but I am not sure whether he is on the Recorder mailing list. I'll ask Pete. But regardless of that Paramount produces some wonderful attractions such as "Under the Tonto Rim", "The City Gone Wild" and "Beau Sabreur".

Owing to numerous requests we are bringing to Raymond a novelty film with star performers. It is the Opera film "William Tell" with six high class vocalists, showing you pictures on the screen of this truly wonderful opera and the singers on the stage. It is something really worth while. All seats will be reserved for this performance.

Piercing! Penetrating! Poignant! That's "Beau Sabreur", the answer to "Beau Geste".

Famous Last Words—"See you tonight."

—Lee Brewerton.

Dentistry

DR. H. HARCOURT HEAL
DENTAL SURGEON

Will be in his Magrath office every Tuesday and Wednesday. The remainder of the week he will be in Raymond. Office in Post-office building. Hours, 9 to 12:30 and 1:30 to 6.

FOR SALE—18 pigs, also 2 sows, will farrow about March 23. Phone any evening R 212, Raymond.

WANTED—To rent, 40 acres of beet land. Must be close to factory or beet dump.—Write J. Pebesma, Raymond Postoffice.

Seed Wheat

Look to your seed wheat requirements. I can supply you with 3rd. generation registered Marquis Wheat, reg. Certificate No. E15852 germination test No. 67.640 testing 96 percent germination, at \$1.50 per bu. cleaned; order it now.

Gardening Booklet Is Issued Free

A booklet on gardening written especially from the farmer's point of view, and dealing with the special conditions to be found both in Eastern Canada and on the Prairies, is now being distributed by the Bank of Montreal to its customers and friends.

Like the previous booklets on farming subjects issued by the Bank, the booklet covers every phase of the subject in simple language, and yet gives the methods and results proved by scientific experiment and research to be the most profitable. The value of the instruction given is immensely enhanced by reproductions of close upon 150 photographs and diagrams.

Every farm, it is stated in the introduction, ought to have at least one acre of the very best soil on the place devoted to growing the home supply of fruits and vegetables. The farm garden should not be crowded into a tucked-up patch near the house, but should be planted in long straight rows far enough apart to cultivate with a team and field cultivator. "Then every time you hitch up a team to cultivate the grain or the potatoes, go through the garden; give it a good cultivation. It will take only a few minutes and mother won't have to break her back pulling weeds, and the boys won't have to stay home on Saturday afternoon and hoe when they ought to go fishing."

The directions in the book have to do with the laying out of the garden, the proper preparation of the soil, the choice of various varieties of vegetables to suit conditions of soil and climate, the selection and testing of seeds, the raising of young plants in hotbeds, outdoor planting, cultivation and irrigation, insect pests, and storage. Practically every variety of vegetable is covered in the book, and there is a section also dealing with small fruits.

While written primarily for the farmer, the booklet is valuable to amateur gardeners everywhere, in both town and country. Copies may be obtained, without charge, at the local office of the Bank of Montreal.

No Ephs Nor Cays

The following, clipped from the Rocky Mountain Cyclone, shows how completely the English language is adapted for sudden and unforeseen emergencies:

"We begin the publication of the Rocceay Mountain Cyclone with some phow diphphentlies. The type phounders phrom whom we got our outphit phor this printing ophphie phailed to supply us with any ephs or cays, and it will be phour or phive weex bephore we can get any. The mistaque was not phound out till a day or two ago. We have ordered the missing letters, and will have to get along without them till they come. We don't lique the loox ov this variety ov spelling any better than our readers, but mistagues will happen in the best regulated phamplifier, and iph the ephs and cays and xs and qs hold out, we shall ceep (sound the e hard) the Cyclone whirling, aphter a phashion, till the sorts arrive. It is no joque to us—it is a serious aphphair."
